## Knauf CW Studs

Galvanized lightweight steel sections to be used as vertical stud framing for Knauf W11 Partitions and W62 Wall Lining System. A unique profile design and embossment, enhances the stiffness of the sections and makes for easy identifications on site. Knauf partition metal sections are cold-rolled from high-grade galvanized steel, which complies with EN 10327. All Knauf metal sections comply with EN 14195 and DIN 18182-1.

Type of Stud	Gauge mm	Webb mm	Flange mm	Length mm	Weight g/m	Packaging unit
CW-50 Stud	0,6	48,8	49 35	2500 3000 4000 5000 6000 7500	730	12
